# ORANGE MOROCCO - EXECUTIVE SUMMARY

KEY TAKEWAYS & STRATEGIC RECOMMENDATIONS

## Strategic Recommendations

### 1. Retain at-risk revenue

**155.09K** MAD (**20.8%** of revenue) is flagged high churn risk. Build a weekly watchlist of high-risk contracts, starting with Casablanca-Settat and Rabat-Salé-Kénitra, and assign an account manager to contact each one with a retention offer.

*Target: bring revenue at risk below **15%.***

### 2. Close the Casablanca gap

Casablanca-Settat has the widest gap to target in absolute terms, and Casablanca city (**54K**) lags Mohammedia (**74K**). Reinforce store and tele-sales coverage in Casablanca city.

*Target: reach at least the national attainment of **54.5%.***

### 3. Grow consumer cross-sell

Smart Router add-ons sold only **56** units, versus **179** Postpaid and **145** Fiber sales. Bundle a router with every Fiber and Postpaid contract across stores and tele-sales.

*Target: double router units within two quarters.*

### 4. Diversify beyond Enterprise

Enterprise Cloud & 5G makes up **79.2%** of revenue, a heavy concentration risk. Scale Fiber and Postpaid in Marrakech-Safi, Tanger and Souss-Massa, where revenue sits well below target.

*Target: lift non-Enterprise revenue share from **21%** to **25%.***

**Note :** Synthetic dataset created for demonstration purposes. Not actual Orange Morocco data.
